

StreamVault Entertainment

Campaign Performance Summary — FY 2024-25

Marketing Intelligence Unit | Confidential

Reporting Period: June 2024 – April 2025

Overview

This report summarises the performance of all major marketing campaigns executed across StreamVault's title portfolio between June 2024 and April 2025. Total marketing expenditure across the period reached \$47.2M, generating an estimated 2.1 billion impressions. Return on Ad Spend (ROAS) averaged 2.8x across the portfolio, with Stellar Run achieving the highest ROAS at 6.1x — making it the most efficient campaign in the company's history.

Stellar Run — Campaign Deep Dive

Stellar Run launched on November 15, 2024 with a \$12M marketing budget — significantly above the company average of \$7M per title. The campaign strategy prioritised Social Media and Influencer channels, accounting for 68% of total spend. The decision to invest heavily in creator partnerships (120+ YouTube and Instagram creators) proved transformative: the #StellarRunChallenge hashtag accumulated 420M views on short-form video platforms within 6 weeks of launch.

Channel	Spend (USD)	Impressions	Clicks	Conversions	CPA (USD)
Social Media	\$4,200,000	580,000,000	8,400,000	210,000	\$20.00
Influencer	\$3,960,000	420,000,000	6,300,000	189,000	\$20.95
TV Ads	\$1,800,000	320,000,000	N/A	42,000	\$42.86
Search Ads	\$1,200,000	98,000,000	4,900,000	87,000	\$13.79
Billboards	\$580,000	74,000,000	N/A	11,000	\$52.73

Email	\$260,000	18,000,000	2,160,000	43,000	\$6.05
-------	-----------	------------	-----------	--------	--------

Channel Effectiveness — Portfolio View

Across all campaigns, Social Media and Email consistently delivered the lowest cost-per-acquisition. TV Ads and Billboards, while generating high impression volumes, showed weaker direct conversion metrics. The data suggests a continued migration of conversion-driving activity toward digital channels, particularly for the 18-34 demographic.

Channel	Total Spend	Avg CPA (USD)	Avg ROAS	Best Title
Social Media	\$14,800,000	\$21.40	3.8x	Stellar Run
Influencer	\$12,300,000	\$22.10	3.5x	Stellar Run
TV Ads	\$9,200,000	\$44.20	1.9x	Iron Protocol
Search Ads	\$5,400,000	\$14.30	4.2x	The Silent Code
Email	\$3,100,000	\$6.10	5.1x	Heartstrings
Billboards	\$2,400,000	\$53.70	1.4x	Neon Dynasty

Comedy Campaign Post-Mortem

Comedy titles (Laugh Factory, Comic Relief, Punchline) collectively received \$8.4M in marketing spend yet generated an average ROAS of only 0.9x — the only genre below break-even. Key contributing factors identified through audience research:

- Broad demographic targeting (18-55) diluted message relevance. Audiences responded better to niche-specific comedy messaging.
- Creative assets for all three titles tested below-average in focus groups (scores: 42/100, 38/100, 51/100 vs. portfolio avg 67/100).
- Release windows overlapped with major sporting events, suppressing prime-time viewership windows.
- Influencer partnerships were limited to general lifestyle creators rather than comedy-specialist channels.

Q2 2025 Recommendations

- Increase Social Media and Influencer allocation to 65% of total campaign budget (from current 58%).
- Implement audience cohort targeting based on Stellar Run viewer profiles for Echoes of Tomorrow campaign.
- Reduce Billboard spend by 30%; reallocate to Search Ads which show 4.2x ROAS.
- Require minimum focus group score of 60/100 before creative asset approval for any comedy title.
